An audit involves performing procedures to obtain audit evidence about the amounts and disclosure in the financial statements. The procedures selected depend on the auditor's judgment, in the assessment of the risk of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessment, the auditor considers internal control and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the
